

# Emergency Bag

*Emergency bag in high quality containing equipment for rapid response*

Lotek A/S offers an emergency bag containing equipment for rapid response when the seconds are crucial.

## High and practical quality

The emergency bag is manufactured in durable and dirt-repellent material, which ensures easy cleaning after use. The bag can be quickly transported to the injury site, either in one of the handles or as a backpack.

## Gathers necessary equipment

The emergency bag gathers the necessary first aid equipment and ensure that you carry everything with you to the emergency. The bag is suitable for larger companies with their own Samariter or fire departments. In addition the bag is suitable for first aid guards, security guards, fire and rescue vehicles, sailing and sports clubs, swimming pools etc.

## Personalization of the bag

There is ample opportunity for adjusting the content of your bag depending on local conditions; neck collar, bandage products, burns treatment, spanning for stretchers, oxygen- and blood pressure gauges etc.

*Lotek A/S provides three different content packages for the emergency bag. However, there is room for more content as needed. Type II also contains a Samaritan PAD debibrillator and accessories (see below). Type III is particularly suited for shipping and meets the Danish Maritime Authorities suggestions for content in emergency bags.*

Lotek provides three standard versions of the emergency bag. See reverse side for list of contents.
